Short biography

Paolo Maioli received his B.Sc. in Physics from the University of Bologna, Italy, in 1999. After a Ph.D. at the Ecole Normale Supérieure of Paris, France (microwave cavity QED experiments, group of S. Haroche and J.-M. Raimond) and a post-doc at the University of Florence (degenerate quantum gases, group of M. Inguscio), he joined the FemtoNanoOptics group (F. Vallée and N. Del Fatti) at the University of Lyon, France in 2007, where he currently works as CNRS researcher. Presently, his research interests cover linear and ultrafast spectroscopy of metal and hybrid nanoparticles, both through ensemble and single-particle experiments.
